We are already hard at work! Here’s an overview of the next few weeks. Please look for additional information in Monday folders.

Writing: We are writing personal narratives about “a time when a teacher or someone else helped me.” Ask your student about his/her chosen event.

Math: We are continuing to work on place value, addition, and subtraction. You can help your student by reviewing addition and subtraction facts at home.

Social Studies: This unit covers how we make good choices. Choices always involve “opportunity costs.” Ask your student what opportunity cost means.

Reading: Students are reading short stories and identifying the story elements (setting, characters, plot) and main idea. Reminder: Fourth graders should be reading for 15-20 minutes each night as part of their homework.

We know your students’ success depends on many things, including a positive attitude and willingness to try new things. That goes for students, teachers, and parents. We are in this together!
Ms. Olivas, Mrs. Johnston, and Ms. Diff are so happy to have your child in our classes! The students have done a wonderful job adjusting to the routines and procedures we have put in place. So far in class we have been working on these Learning Targets:

Reading: We are learning how to use pictures to help us read.
Writing: We are learning how to draw a real person.
Math: We can recognize, count, and write numbers 1-10.
Social Studies: We can explain and demonstrate what it means to be a good student at Eiber.

***Items to work with your child on at home***
1. Learning how to write their first and last name.
2. Counting to 10
3. Learning how to tie their own shoes

***Dates to keep in mind***
- No school September 20th
- October 22nd & 23rd Parent Teacher Conferences: Please make sure that if these dates do not work for you, contact your child’s teacher and arrange for another date
- October 24th Trick or Trunk

***Friendly Reminders***
- With the weather being so hot, please make sure your child is dress appropriately. Please make sure girls are not coming to school in spaghetti strap dresses or shirts, and boys are not wearing undershirts.
- Monday folders are blue. They come home on Mondays and should be returned on Tuesdays empty.
- Have your child bring a backpack to school everyday.
- Please make sure your child is arriving to school on time. The first bell rings at 8:35 and children are expected to be in class at this time to begin working.

We appreciate all the support we have been given by you as parents. Your support lets your child know how much you value their education and we can see that filter into the classroom when they come to school ready to learn and take responsibility for their own learning. As always if you need anything our doors are always open to help you in anyway we can.
Welcome back first grade families! We’ve started the year off building our classroom communities with morning circles and restorative practices. Thank you to the families that attended Technology and Curriculum night! The parent-teacher partnership in your child’s education is very important to us! This year we are using an amazing app to share your child’s learning with you. Please download the Seesaw App by using information sent home in the parent letter if you have not done so already. This will allow your child to share moments of their day with you. In class, we have been going over expectations for 1st grade. We have been learning the good habits of a reader and looking at books like authors.

We are starting our first science unit on solids and liquids. In math, we have been working with partners to 10. We are very excited for all of the learning your child will do this year! It is VERY important your child is here every day and on time. If your child is getting home in a different way than normal, please contact your child’s teacher or the office. Please make sure your child has working headphones. It is very important that they have headphones everyday in class. Their headphones may need to be replaced half way through the year. Please remember to have library books returned by Thursday of each week.

* Monday Folders will be sent home each Monday and will need to be unpacked and returned on Tuesday.

We are excited for a great year in 1st grade!

Hello Families!

We hope you had a wonderful summer and are getting back into the swing of things this year! As the student leaders of the school, we are working hard on being positive role models and good leaders for the younger students to look up to.

We have started diving into our learning with our unit on Decimals in math. We are learning all about how to read, round, add, and subtract with decimals. Soon we will be looking at multiplying and dividing decimals so please, please, please help your students learn their multiplication and division facts if they do not know them. If you need flash cards or any resources let us know and we will send them home with your student.

We are so excited for this year and look forward to a great year of learning!

Mrs Stull
Ms Gallegos
Every day is exciting in our third-grade classrooms and we've started this year running. We are practicing routines and learning new expectations as we prepare for being 3rd graders. Here is what is currently going on:

We've started reviewing what we know about place value and numbers in preparation for our work on multi-digit addition and subtraction. This will be the base that will support our studies of multiplication and division, which will start sooner than you think! Our literacy studies will center around writing narrative stories and comprehension strategies for reading fiction and non-fiction texts. We are also beginning our unit on life cycles in science! We will study several different organisms during this unit. Look for information about a field trip coming up soon!
